

Dear FCC reviewers,

K-LOVE is an integral part of our family, serving as a primary news and music source as we work around the house and drive through our community. K-LOVE is an asset to our county, providing moral viewpoints and considerations that are not available through normal broadcast channels because of their subscriber-supported status. It also provides a safe alternative to the \*increasing\* amount of vulgar ideas and music that is continuously broadcast into my area. To continue on a solid path, my kids \*need\* to be hearing viewpoints (from other sources than just their parents) that counter a media worldview focused on materialism and "if it feels good, it must be OK." Those morally bankrupt ideas are \*not\* what made this country strong and good, and only stations like KLOVE preserve and reinforce the ideals of our those that created America. If KLOVE were replaced by alternate broadcasters, I find it hard to believe they would provide the same fundamental benefits to the community. Therefore, I would request the FCC permit KLOVE to continue broadcasting in the current manner, which serves the community by promoting strong families, friendships, charity and civic duty.
